This is one page worth of information repeated to fill 73 pages. For example--Here is how fast a flea reproduces, how far it jumps. Let's look at five different types of fleas. Here is how fast they each reproduce and how far each one jumps. (All the same info)It offers no new information on controlling fleas but says they should be controlled.This was the biggest waste of money I have ever made on a book.

Save your time and money.... just check with "friends, family, forums, vet and/or the Internet". Information in this book is REDUNDANT, and vague.

This book is full of information about fleas and how to control them. If you have a flea problem, you need this book. It is well worth the money!

Knowing nothing about fleas but suddenly finding an itching desire to know more, thanks to my young daughters new kitten, I would recommend this book, it told me all I needed to know about fleas but wished I didn't! "Argh" just writing this is making me itch again!
