This is a great way for me to brush up on my Greek. The British accent that is narrating is a bit annoying at times. Well worth it!

This elementary primer in modern Greek seems to me well thought-out and helpful. Unlike the Teach Yourself series (which I know from the Portuguese and Italian units although not from the Greek one) it sticks to the absolute basics and repeats the material several times over. Roughly speaking, it is all about asking for things, plus a little on how to tell people if you are feeling unwell and how to make your preferences known with regard to food and drink. There are no

verb-formations, and pretty much everything that is not interrogative is in the present tense. There is some dialogue, still at this elementary level, but none of the strange 'conversations' of the kind that exist only in language primers. This makes the approach very flexible. Obviously we can replay or skip any track as we see fit. There are 3 cd's as well as the booklet, and it is very easy to follow the booklet from the spoken words. I would certainly recommend reading through the book before doing any listening. Apart from anything else this helps one dispense with the first track, which consists of an over-lengthy introduction telling us how good the course is and how it is structured, the latter being perfectly clear from the booklet itself. There is no vocabulary section, understandably considering how limited the vocabulary has been, but also consistently with the basic aim of this course to teach from the spoken word and not from print. Obviously with Greek there is a new alphabet to learn, and for some strange reason it is given in lower case only. This will certainly not be enough for complete novices, who may well not recognise, say, a capital eta or a capital xi. I would also have welcomed a little more precision in the guide to pronunciation, especially with regard to the pronunciations of -nt-- and the letter gamma. Apart from that, if you do not fault the course for its limited aim and scope, I would call it very friendly and useful, and I can recommend it.
