Insects CD-ROM And Book (Dover Electronic Clip Art)

Synopsis

Featuring engravings from the "cabinet of curiosities" assembled by 18th-century zoologist and collector Albertus Seba, this fascinating collection crawls with beetles, ants, butterflies, moths, caterpillars, centipedes, flies, mosquitoes, dragonflies, and other insects. It includes latter-day images as well, encompassing 642 illustrations – 206 of them in full, glorious color.

Customer Reviews

Jim Harter is a successful artist and editor of several Dover Pictura CD-ROM Books, including Harter's Picture Archive for Collage and Illustration, Landscapes and Cityscapes for Artists and Craftspeople, Nautical Illustrations, and more.

Most of the illustrations in this book are in black and white which can be a little disappointing however this can also add an old world charm to them. I can imagine a great t shirt with beetles crawling over the shoulder, wouldn't a little boy love this!! The illustrations are very detailed and varied. There are beetles, moths, mantis, butterflies etc and even the odd spider. Any one who likes bugs would enjoy this book and CD-ROM. I have used software as simple as Word and Publisher to use these images. The pictures could be used in card making or scrap booking and even school projects or decoupage.

This book is beautiful and has very useful pictures of insects. It is a nice addition to my reference library. The colors are crisp and clear and the detail is great. I use Dover books for reference for my art and when working on projects with my grand kids. Dover books are reasonably priced and rarely disappoint, This one is no exception. I haven't used the CD so I can't comment on that. The book arrived in a timely manner and in good condition.

Dover never disappoints! Quality images scanned at good resolutions and the most common file types. The book includes both colour and b/w images of all kinds of insects printed on both sides of the page (so if you're looking for ready to cut decoupage materials you'll have to print out the items you want yourself.) The critters aren't identified individually but are organized by scientific orders. Jime Harter's collections are full of marvelous images that drive one mad trying to figure out all the uses for them.

I wanted this for reproducing onto stick-and-burn paper. The illustrations are great but very detailed for my purposes. The CD makes working with them on the computer and transferring easy.

I will enjoy using some of these insects on various woodburning projects. The insects in this book are a good size and each image is very clear.
