Customer Reviews

I bought this for my 12 year old son to work on during the summer. It's fine for keeping kids brushed up on math skills. We are about halfway through now and found about 3 problems that are vague, have more than one possible answer, or give an incorrect answer in the answer key. But overall, it's a good review; it could even be a review for younger grades, as some of the problems are too easy.

Good daily review for my math challenged son. The diversity of problems is great since my son has difficulty switching mental gears to problem solve

Bought this for my daughter the summer between 6th and 7th grade. She's in advanced math so is

about a year ahead. Perfect for reviewing skills over the summer without having to spend much time doing it.

Great for summer skills work for my kids. Quick and simple to take out and do. Maintains and keeps their mathematical brains going.

This is a quick way to keep the math skills up during the summer. I agree with others that it takes about two minutes to complete each page, but that's great in comparison to what we have been doing in the past. We get this done quickly at the start of the day and then move on. Glad I found it.

Good for reviewing the basics

Love these math minutes! I am a math teacher and I begin each math period with a math minute to get the students thinking. The students meet the challenge and continue to get better with their basic math skills that are necessary to answer the problems!

Really good workbook to have if your child needs help figuring out where the strengths and weakness are in all areas of 7th grade math. Answers in the back.
