Douglas J. Futuyma is Distinguished Professor in the Department of Ecology and Evolution at the State University of New York at Stony Brook, USA. His major research interests include evolution of host specificity in herbivorous insects and of interactions among insects and plants, speciation, and evolution of community structure. Dr. Futuyma received the 1997 Sewall Wright Award of the American Society of Naturalists and the 2012 Joseph Leidy Award of the Academy of Natural Sciences of Drexel University. He has served as President of the Society for the Study of Evolution (1987), the American Society of Naturalists (1994), and the American Institute of Biological Sciences (2007), and was elected a fellow of the American Academy of Arts and Sciences in 1996 and the National Academy of Sciences in 2006. Dr. Futuyma has served as Editor of *Evolution* and is currently Editor of the *Annual Review of Ecology, Evolution, and Systematics*.

This book was well organized and interesting. It seemed to be overly wordy in some sections, but overall pretty good. The author includes a plethora of colorful diagrams, pictures, and graphs to help the reader understand as well as to keep the reader's attention. The only thing I didn't really like was

the way the author didn't have a separate section for human evolution. This is usually what students find the most interesting so it is sprinkled throughout the book in an attempt to make the various sections more interesting. I think this is an ok approach but I think human evolution deserves a dedicated section.

5 gold stars!

Sinauer Associates lists the 4th edition for March 17, 2017 so I will order it as soon as it becomes available. I have the two previous editions.

A very informative book. It explains processes perfectly and is very effective and teaching concepts. it makes them easy to understand and relate to!

Lots of good information and data, plus access to online "ebook" because it is quite heavy to carry around. I am only on Chapter 4, but I am impressed with pictures and diagrams. It is the required textbook for a class.

Excellent book for my daughter preparing for Biology Olympiad competition. Also purchase a couple more advanced Biology books. All reviews on are so helpful to me in giving me the best advise there is available. Thanks .com

Purchased this book for school purposes. Arrived in great condition! As far as personal enjoyment=NONE! But for the purpose of my class in college=PERFECT!

I have the 1st edition, too, and like this one even better. Easy first text in evolutionary biology without being simplistic.
