Grade Level: Kindergarten and up

Customer Reviews

Angela Royston has written and edited many books for children about science and nature. --This text refers to an out of print or unavailable edition of this title.

My 2 1/2 year old is nuts for this book!! We got it when she was going to be going to the dentist. As it turned out, she had two very small cavities. She was very prepared for what the dentist would do (from another book) and knew what had happened to cause the cavities from this book!! She can tell you all about the enamel, the dentine, what bacteria does with the sugar you eat and how it hurts your teeth. It's amazing how much she loves this book, she just came in and saw it and is now asking me to read it again!! She loves it!! I am going to check out more in this series.
