Good information for students in counseling program. Written from a feminist point of view. Would be a good reference to have in one's office library.

more interesting than I thought it would be. thanks

This was one of two books from this author that was required for a marriage and family therapy program course. This book is definitely written from the feminist point of view and contained more opinions than supported data or facts. I found myself shaking my head in disbelief at a large portion of the books. It's no wonder that the used prices are just pennies- only books that are no good are this cheap. You get what you pay for.

This is a major source of the feminist critique of the marriage and family therapy (MFT) field. The authors deconstruct the gender power-biased theories upon which MFTs draw so that clinicians can choose to be more inclusive in their work by, first, recognizing power processes, and, then, sensitively and empathetically addressing these issues in order to help couples, as well as parents and children, engage in more mutually beneficial relationships.
