Customer Reviews

Fun-filled demonstrations for revealing truths about God and creationNothing captures the attention of young people--and adults--like a creative object lesson. This hands-on book has 77 exciting science activities that reveal the order and grandeur of creation and encourage an appreciation of all God has made. Each activity includes a key verse from Scripture, a Bible lesson, an activity, and a science explanation. These easy experiments illustrate the laws of nature, teach Bible principles, and affirm God's power as Creator. Included are lessons about God's design music God's promises heaven angels the authority of the Scriptures weather stability in a changing world forming good habits appreciating our senses patience trust salvation understanding faithThe clearly explained demonstrations use common household objects, require little setup, and are illustrated with diagrams. With a presentation of Scripture and dramatic results, the science activities in this book make Bible truth unforgettable. Donald B. DeYoung is a scientist, author, and chairman of the science and mathematics department at Grace College in Winona Lake, Indiana. He is the author of several books on science and the Bible and speaks on creation, detailing how the intricacies of nature are a powerful testimony to the Creator's care for mankind. Don serves as president of the Creation Research Society, a worldwide group of scientists who promote biblical creation.

I am having so much fun with my Wednesday night class of 3rd through 5th graders using 77 Fairly Safe Science Activities.

Absolute great for VBS and Children's church. Really helpful when working with older children.

While this book would be perfect for short children's sermons, it wasn't exactly what I was needing. Wanted a little bit more in the lessons. Going to be doing a science theme during class this semester.

Great ideas to use science to teach about the Bible! My daughter is very interested and it captivated her attention. I decided to buy this for her cousins as well!

More than 50% of the experiments I've tried have worked for me. Some of them I may have to try more than once to achieve the desired results.

amazing

I love this book and so does my class! Connecting science and the Bible is just wonderful! Most of the items needed for the experiments are very common household items or cheap to buy. It's great for Sunday School classes or School(at least Christian schools!)

Had good ideas that were not in the other books I had looked at.
