How To Find Out Anything: From Extreme Google Searches To Scouring Government Documents, A Guide To Uncovering Anything About Everyone And Everything

Synopsis

In *How to Find Out Anything*, master researcher Don MacLeod explains how to find what you're looking for quickly, efficiently, and accurately—and how to avoid the most common mistakes of the Google Age. Not your average research book, *How to Find Out Anything* shows you how to unveil nearly anything about anyone. From top CEO's salaries to police records, you'll learn little-known tricks for discovering the exact information you're looking for. You'll learn:

- How to really tap the power of Google, and why Google is the best place to start a search, but never the best place to finish it.
- The scoop on vast, yet little-known online resources that search engines cannot scour, such as refdesk.com, ipl.org, the University of Michigan Documents Center, and Project Gutenberg, among many others.
- How to access free government resources (and put your tax dollars to good use).
- How to find experts and other people with special knowledge.
- How to dig up seemingly confidential information on people and businesses, from public and private companies to non-profits and international companies.

Whether researching for a term paper or digging up dirt on an ex, the advice in this book arms you with the sleuthing skills to tackle any mystery.

Customer Reviews

Don MacLeod has been a law librarian for more than 20 years at four of the most prestigious law firms in New York City. Since 2001, MacLeod has regularly presented a seminar titled *How to Find Out Anything* for mediabistro.com. His research tips have been quoted in *Real Simple*, among other publications.

Don't buy if you are familiar with the internet.

This is a great reference for investigators of all experience levels. For its size and price it is packed with useful sources. Internet tools and sources change rapidly so any publication, regardless of size is quickly obsolete. I have purchased other resources, and have spent years compiling my own list of useful sites. This book is more than just a list, it includes tips on making the best use of the tools it contains.

This book is excellent. I am a librarian. I took a reference class years ago. This book would have been a great supplement to the course.

I teach information literacy at the library. I use this book as my aid and think it is the best book on the subject of online research because: a) It is written in a friendly and comfortable style b) It is NOT a textbook c) It focuses on connections more than the new fad technology This is a great book and I encourage Don to write more books for information literacy educators to share with their students.

truly outstanding book

As presented with timely delivery

It is a great book, though there is information that is outdated.

Very good and interesting material to use for locating people, places and things that you may not have information on or about. I will use it for my business as a reference. I recommend this if you are in the business of locating people.
