## **Customer Reviews**

James Sumich currently teaches Marine Biology, Statistics for Life Sciences, Mammals of the Sea and Organismal Biology at Grossmont College. In addition to being a leading marine biologist and textbook author, he is extremely well known and respected in the biology and physiology of gray whales research.

Textbooks are notorious for being boring and hard to get through, and this was no exception. The authors keep the material simple, which is good for an intro book, but it's dry and monotonous. It's takes so much effort to concentrate on what you're reading, that most of the information isn't

retained. I'll read a page and have no idea what it said. If you're not particularly interested in the subject, this book will be impossible.

Perfect for the class

High quality print with nice illustrations.

Boos is just as described and was packaged perfectly.
