# Energy Law In Europe: National, EU And International Regulation

## Synopsis

The energy sector in Europe has changed rapidly over the last few years under the influence of trends towards globalization, liberalization, competition, de-monopolization, and strengthening of regulation in the field. The new edition of this book builds on the success of the first in providing an updated overview of these important developments at both international and European levels, covering the most important principles of international law of relevance to the energy sector. A chapter dedicated to comparison of legal developments across Europe addresses the increasingly important question of whether we are heading towards an international energy market. New chapters on European Union External Energy Relations and Standards of European Energy Trade highlight growing cooperation in the energy field with major producers such as Russia, and the standards for trading energy in an integrated geographical market, including analysis of the product markets, as well as the relevant legal instruments and master agreements. The book also focuses on the implementation of the significant Energy Directives, and the constitutional and regulatory framework in the key energy-producing jurisdictions in the EU: Denmark, France, Germany, Italy, the Netherlands, Norway, Poland, Spain and the United Kingdom. The national coverage emphasises trans-border collaboration by examining bilateral and multilateral cooperation within the context of the European Union. There is also updated analysis of developments in these countries in every energy sector, including oil, gas, nuclear energy, and in response to the Kyoto protocol, to renewables and emissions, with the extent of coverage determined by the resource base of each country.

## Book Information

Hardcover: 1488 pages

Publisher: Oxford University Press; 2 edition (February 11, 2008)

Language: English

ISBN-10: 019921719X

ISBN-13: 978-0199217199

Product Dimensions: 9.8 x 2.6 x 7.1 inches

Shipping Weight: 4.8 pounds (View shipping rates and policies)

## Customer Reviews

"Fulfils the high expectations induced by the impressive list of authors. It is well-structured, all topics discussed are of essential importance within energy law and it is written in a clear language. The idea of involving a large number of highly reputed scholars with expertise within different areas of energy law has as a result that each chapter of the book can be read individually as legal essays which together provide a unique overview of present energy law in continental Europe."--Michael Budtz, Kromann Reumert, Denmark

Martha Roggenkamp is a Professor of Energy Law at University of Groningen, and Senior Researcher at Simmons and Simmons, Rotterdam. Catherine Redgwell is a Professor of International Law at University College, London. Anita Ronne is an Associate Professor of Energy Law, the Law Faculty at the University of Copenhagen, and Chairman of the Danish Energy Law Society.
