Action Research

Synopsis

The Fourth Edition of Ernest T. Stringer's best-selling Action Research offers easy-to-follow, clear guidelines that enable novice practitioner researchers to move comfortably through a process of inquiry and applied research. Featuring real-life examples and providing effective solutions that foster understanding of research procedures in real-life contexts, the book offers a simple but highly effective model for approaching action research: Look: building a picture and gathering information, Think: interpreting and explaining, and Act: resolving issues and problems. Using his own experience as a guide, Stringer encourages readers to grapple with the broader political and ethical challenges that frame each inquiry. The author's engaging style makes the book especially relevant to those working with children, young adults, or people in community contexts, and is particularly relevant to those dealing with issues of diversity or with marginalized and disenfranchised groups. Clear, concise, and practical, Stringer's accessible and engaging book is a must for students and professionals in educational, business, health, counseling, and social work settings.

Book for class. DRY, DRY, DRY.

It's a textbook for me... so not super exciting.

Ideas and structure of the book are very helpful for my course

This book is an excellent resource for understand action research from the point of view of an expert. It is brand new and I received fast as you said. I would recommend to my classmates.

Interesting concept but it's a stretch to find this book useful in the complex world of adaptive leadership.

Used for class

Goon condition and great resource.

Very practical and relevant to anybody in the field of community development .
