Customer Reviews

I don't like this textbook at all. Some of the formats of addressing new material are not at all intuitive. Instead of things being presented clearly and together, many times part of the subject matter is in a format that is understandable but then other material that should be included is presented outside the main presentation and is easily overlooked unless you pay VERY close attention. Otherwise you will miss it. The student I tutor hates the book for this reason and I agree with him. Of all the textbooks I use, and I use many, this is the worst.

Used it for school. Was in excellent condition.

I've taught using some of their curriculum and it's just not engaging, creative, nor complete. Dumbs down the language.

Great book for learning spanish

Book was in good shape better than the one my child's school provided. I buy them so they don't have to lug them home everyday.

Great addition to continue studies in Spanish. Like that the internet links still work. Recommend to anyone studying for Spanish.

Although I have only studied Spanish for a short time and without a classroom experience, this is a great book. I have added additional of the series to my collection and hope they are as good.

Very good
