Practice Math Tests For SHSAT (Volume 2)

Synopsis

This book is a second volume in the series, and offers a collection of 5 more full-length practice exams for the math section of the SHSAT, the New York City Specialized High School Admissions Test. The tests in this book fully match the new 2017 SHSAT exam format: each test contains 57 questions (of which 52 are multiple-choice questions, and 5 are grid-in questions), and is designed to take 90 minutes. Each of the exams contains well-written problems that were thoroughly tested by real students who have been admitted to the top specialized high schools. The included practice problems are consistently kept up-to-date and closely match those found in the real SHSAT Math section. The book also has full solutions for each of the exams. This collection is ideal for students who desire additional practice for the SHSAT exam and want to make sure that they are using high quality, recently updated material. This edition is fully up-to-date with the current SHSAT exam.

Book Information

Series: Practice Math Tests for SHSAT

Customer Reviews

Violetta Dubinina is an accomplished educator and author with nearly 40 years of experience teaching mathematics to students at all grade levels. Mrs. Dubinina's students have received awards at state and national mathematics competitions and a majority of those who apply to New York City specialized high schools are admitted to the school of their choice. Mrs. Dubinina teaches at a Blue Ribbon school, and is the recipient of the prestigious Mathematical Association of America Edyth May Sliffe Award for Excellence in Teaching.

Great book that is designed for a specific audience (ambitious kids who are looking for a challenge) and problems are carefully chosen to help kids get ready for the test.

The questions are challenging and the explanations are clear. Furthermore, I appreciate the author's openness to her students in providing contact information for feedback. Thank you!
