Customer Reviews

This to be used in the class room.

The best ecology textbook that I've seen! I have taught ecology in a public high school for a number of years, and I tell my students that if I were ever going to write a textbook myself, this is the one that I would write. Now I don't have to; it's already been written! It is very readable and is just the right fit for my students. Karen Arms has written a masterpiece!

No answer found.

This is basically a page of multiple choice questions for each chapter. It is not a guide to what elements the student should make sure they understand, extra in-depth explanations of terminology, what items are less important, how to approach the material, or anything really useful. The teacher could use this as an extra simple unit test.
